ABOUT ME

A passionate and self-driven IT student. Whether it's developing responsive websites, optimizing code, or crafting engaging videos around mental health and growth, I bring both logic and empathy into everything I do. I am also effective when it comes to event management and videography. I consistently nurture my cognitive skills in core disciplines. This dedication shapes my ability to thrive as a future-ready techno guy in today's competitive global environment.

EDUCATION

Rajalakshmi Engineering

College

B-Tech Information
Technology

August 2022 - 2026

Information Technology

6.96

CGPA

Velammal Vidhyala

Annexure

HSC - Grade 12 CBSC

June 2021 - June 2022

Mathematics, Physics, English, Chemistry, Computer Science, Physical
Education

75%

Bhavan's Rajaji

Vidhyasharam

High School - Grade 10
CBSC

June 2019-March 2020

Mathematics, Science, Social Science, Second Language, Computer

PROJECTS

Code Quality Checker – Academic Project

- Built a tool to analyze and optimize code for efficiency, readability, and structure.
- Implemented static analysis checks and suggestions using Python.
- Contributed to testing and debugging within a team of four.

Next-Gen Telehealth: A Low-Latency

IoT and Edge AI Framework for Personalized Remote Diagnosis

- The innovative wearable health monitoring device proposed here is aimed at being a reliable and silent helper that keeps an eye on the user's physiological measurements such as heart rate variability, sleep quality, and activity levels.

OpenWeather API

- Created and launch a Basic Weather Application using Cloud Hosting and API integration. We used Netlify for Cloud Hosting this Weather API Model

PROJECTS

HealthTrack — Telehealth & Remote Health Monitoring Application

Developed HealthTrack, a Flutter-based telehealth application integrated with an Edge AI smartwatch and Firebase, featuring real-time health monitoring, role-based dashboards, appointments, SOS alerts, GPS sharing, health reminders, and doctor-patient communication.

CodeZee - Code Quality Checker And Optimization Tool

Developed CODEZEE, a code quality checking and optimization tool designed to analyze source code, identify quality issues, and help developers improve code efficiency, readability, and overall maintainability.

SKILLS

A growing technical skill set built through academic projects, hands-on development, and continuous learning across programming, AI, data, and software development.

- Python
- Data Analysis
- Pandas
- Generative AI / LLM Fundamentals
- Machine Learning Fundamentals
- Git and GitHub
- Firebase
- HTML/CSS
- Bootstrap

PROFESSIONAL SUMMARY

My skill set combines technical expertise with creative and social media marketing experience, allowing me to approach projects from both a technology and audience-focused perspective. I am a curious and highly motivated learner who continuously explores new tools, technologies, and creative strategies to expand my capabilities.
